Collector coins issued by NBP are sold at NBP regional branches and in the NBP online shop.

On 19 July 2022, Narodowy Bank Polski will be putting into circulation a collector banknote “Protection of Poland’s Eastern Border”, with the face value of 20 złoty.

Narodowy Bank Polski is the central bank of the State, responsible for its monetary policy and price stability. The Bank’s functions are described in the Constitution of the Republic of Poland and the Act on NBP. NBP holds the exclusive right to issue the currency of the Republic of Poland. As the central bank, it does not provide accounts for the general public, accept deposits from or extend loans to individuals. It acts as a banker to the State budget and public sector entities. NBP also holds and manages the foreign exchange reserves of the State. Finally, it functions as a banker to banks, creating conditions for the operation of the Polish banking system. Narodowy Bank Polski is one of the most important research and analytical centres in the fields of economics and financial markets. For more information on NBP visit: www.nbp.pl

On 12 July 2022, Narodowy Bank Polski is putting into circulation a silver coin “100th Anniversary of the Discovery of the Complex of Prehistoric Striped Flint Mines ‘Krzemionki’”, with a face value of 50 złoty.

One hundred years ago, on 19 July 1922, a young geologist Jan Samsonowicz was exploring the fields of Krzemionki village in the former Opatów district of the Kieleckie voivodship. Among the fields and meadows, he came across a large concentration of unusual, funnel-shaped cavities. They turned out to be prehistoric mining shafts. Samsonowicz managed to descend into several prehistoric pits, where he found the original mining tools made of flint and antlers. Having carried out the necessary inspections and measurements, he realised that he was dealing with a unique, unprecedented discovery. He found extensive prehistoric striped flint mines which had operated there during the Neolithic and Early Bronze Age (approx. 3900-1600 BC).

The first archaeological excavations in Krzemionki were started in 1925 by Józef Żurowski. The site became the scene of research conducted by several generations of Polish archaeologists. Owing to their work, it was possible to gather impressive knowledge about the life and work of prehistoric miners who thousands of years ago used to extract striped flint in this area and who had mainly used it to make polished axes. In the third millennium BC they were distributed within a range of 660 kilometres from the mines.

In Krzemionki, four thousand mines of striped flint had been dug, forming a mining field covering an area of about 78 hectares. Both the underground workings, carved into the limestone rock, and the surface landscape transformed by prehistoric mining activities are well-preserved. Today the site remains under the protection of the Historical and Archaeological Museum in Ostrowiec Świętokrzyski and is a part of the nature reserve. Its collections and the underground tourist route are open to visitors.

In 2019, Krzemionki together with the archaeological sites (the Borownia and Koryczna mining fields, the Neolithic settlement on the Gawroniec hill in Ćmielów) were inscribed on the UNESCO World Heritage List.

The reverse of the coin issued to commemorate the 100th anniversary of the discovery of the mines features an image of a prehistoric miner at work and an elliptical insert made of striped flint.

Face value: 50 zł
Metal: Ag 999/1000
Finish: standard (lens-shaped, high relief, striped flint, oxidised)
Diameter: 45.00 mm
Weight: 62.20 g
Edge (side): plain
Mintage: up to 7,000 pcs

Designer: Urszula Walerzak
Issuer: NBP
The coins, commissioned by NBP, were struck by Mennica Polska S.A.
